Thank you for purchasing your new Kenwood Dishwasher. These operating instructions will help you use it properly and safely. We recommend that you spend some time reading this installation/instruction manual in order that you fully understand all the operational features it offers. Read all the safety instructions carefully before use and keep this installation/instruction manual for future reference.

unpacking

Remove all packaging from the unit. Retain the packaging. If you dispose of it please do so according to local regulations.

The following items are included:

- the main unit
- cutlery basket P.N.: 673002200099
- detergent measuring spoon X 1
- 1 full spoon = 20g (approx.) P.N.: 673002200079
- measuring cup X 1
- 60ml (approx.) P.N.: 673006200004
- salt funnel X 1 P.N.: 673002200043
- water supply hose X 1 P.N.: 673000090060
- condensation strip X 1 P.N.: 675001300016
- lower hook X 2 P.N.: 672000200103
- U-shape hose holder X 1 P.N.: 673006200003
- hop hook X 2 P.N.: 672000200023
- ST4 screws X 10 P.N.: 672000900040
- 3.5x25 screws X 2 P.N.: 672000900044
- 4x18 screws X 2 P.N.: 672000900039
- ST3.9x13 screws (black) X 2 P.N.: 672000900079
- 4x20 screws X 2 P.N.: 672000900036
- ST3.9x13 screws (white) X 2 P.N.: 672000900078
- door template x 1 P.N.: 675001800195
- instruction manual x 1 P.N.: KID60B10-003

This product has been wet tested to ensure correct operation. As a result some water may remain inside the unit. This is normal and safe. Remove any water droplets from the exterior if necessary.

If items are missing, or damaged please contact Partmaster (UK only). Tel: 0844 800 3456 for assistance.
location

When selecting a position for your dishwasher you should make sure the installation surface is flat and firm, and the room is well ventilated. Avoid locating your dishwasher near a heat source, e.g. cooker, boiler or radiator. Extreme cold ambient temperatures may also cause the appliance not to perform properly. This dishwasher is not designed for use in a garage or outdoor installation.

Do not drape the dishwasher with any covering. When installing, ensure that free space is left at the sides.

⚠️ All parts removed must be saved to do the reinstallation in the future. Ensure the dishwasher is unplugged and empty. We recommend that 2 people handle the dishwasher during installation.

1. Please ensure the dishwasher is installed by a qualified technician. Refer to the tools required.

⚠️ The supplied door template also contains installation steps which will assist installation.

2. Ensure there is clearance each side of the unit to allow slight sideways movement for servicing when required. Good levelling is essential for correct closure and sealing of the door. When the unit is correctly levelled, the door should not catch the inner liner on either side of the cabinet. The adjustable feet may be loosened or tightened in order to obtain the optimum levelling of the unit.
3. The height of the unit is 820 mm. The figure outlines the minimum dimensions required to accommodate the dishwasher within fitted kitchen furniture units.

4. Do not connect the unit to the mains socket before installation. Ensure you are not installing the unit right in front of the mains socket. This is to avoid potential damage to the back of the unit.

5. The condensation strip must be fitted to the underside of the worktop above your dishwasher to protect it against any moisture. Its purpose is to protect your worktop’s underside from steam rising from the dishwasher.

Remove the backing paper from the condensation strip.

6. Stick the condensation strip to the underside of the worktop.

Ensure the surface is clean prior to sticking the condensation strip to the underside of the worktop.

Failure to attach the condensation strip could result in damage to the underside of your worktop!
7. Position the dishwasher next to a water tap and a drain. Ensure the water inlet and drain hoses are not kinked or squashed. The unit must not stand on the mains cable.

8. To secure the dishwasher under the table top, tighten the screws through the top sides of the unit onto the table top.

9. Tape the supplied Door Template to the dishwasher door. Make sure the top of the template is at the top of the door. Drill the required holes following the depth and diameter shown on the Door Template.
10. Install the Aesthetic Panel onto the dishwasher door. Ensure the aesthetic panel weight is a minimum of 3kg and a maximum of 6kg. After the aesthetic panel is installed, the tension of the dishwasher door spring can be adjusted by rotating the adjusting bolt. If the tension is right, the door will remain horizontal in the fully open position.

11. Ensure to tighten the screws on both sides of the dishwasher door and to secure the Aesthetic Panel.

12. Adjust the bolt to loosen or tighten the tension of the dishwasher door.
13. Adjust the adjustable feet again to obtain the optimum levelling of the unit.

14. Make sure your plumbing is suitable for use with the dishwasher. If in doubt contact a qualified plumber. This unit MUST BE connected to COLD WATER MAINS using the new water inlet hose. OLD HOSE SETS MUST NOT BE RE-USED. The water pressure from the water mains needs to be at a minimum of 0.04 MPa and a maximum of 1.00MPa.

- Connect one end of the safety water supply hose to your dishwasher, and then connect the other end of the hose to your water mains. Please ensure the black rubber seal is in place.
- After connecting the hose, turn on your water mains and check for leaks.
- Connect the dishwasher to the mains socket.

You may use a Y-Adaptor (not included) for an additional water feed for another appliance, for example a washing machine. This is only applicable for cold water mains. A Y-Adaptor is available from most DIY stores.

- Do not bend your drain hose.
• You may use the U-shaped drain hose holder to secure your drain hose and to avoid bending it.

• Secure the water drain hose to the waste pipe to avoid it coming off during the washing process.

⚠️ • The waste pipe must only be connected to the foul drains and not the surface water drainage system.
• The water drain hose should be placed between 40 cm and 100 cm from the floor level and must not be extended, otherwise the unit may not be able to expel the waste water properly.
• Please close the hydrant after using.

# The running time will vary due to automatic evaluation system of the dishwasher. This system has an Aqua Sensor which can measure the turbidity of the rinsing water, and will optimise the water temperature and running time to get your dishes clean as quickly as possible.

* To comply with Standards of Performance, i.e. EN50242, please ensure to use economy washing cycle for the test.

**Condensing Dry Technology**
- Energy is saved by drying the dishes using the remaining heat after the last rinse cycle.
- Wash cycle times are extended due to this drying method.
- Some wash programmes do not have a drying function, please refer to the Wash Cycle Table for more details.
before operating

to open the door

• Pull the door handle.
• If the door is opened during operation all functions are automatically interrupted.

to close the door

• After loading the dishes, push the baskets fully into the dishwasher.
• Lift the door upwards and push until it clicks into position.
• Do not slam the dishwasher door.

items not suitable for use in the dishwasher

When purchasing new crockery and cutlery, please make sure they are dishwasher-proof. Some items are not suitable for dishwashers.
• Wooden cutlery and crockery or items with wooden parts may discolour and fade. The glue used in these items is not dishwasher-proof and wooden handles may come loose after being washed in a dishwasher.
• Craft items, antiques, valuable vases and decorative glassware are also not suitable for dishwashers.
• Plastic items (e.g. tupperware) which are not heat resistant may melt or loose shape due to the high temperature in the dishwasher.
• Copper, brass, tin and aluminium items may discolour or become matt.
• Clouding may occur on glasses and delicate glassware after frequent washing. Do not wash delicate glassware, or glassware containing lead crystal in a dishwasher. Wash delicate glassware by hand instead.
• Silver and aluminium parts have a tendency to discolour during washing. Residues like egg white, egg yolk and mustard often cause discolouring and staining on silver. Therefore, please clean the residues from silver immediately after use.
adding detergent power or tablet

Only use detergents specifically designed for use in dishwashers. To be more environmentally friendly, please use no more than the correct amount of detergent. Fill the detergent dispenser with detergent powder or tablet.

Please follow the steps below to fill the detergent dispenser.

1. Push the button on the lid of the detergent dispenser in the direction of the arrow until the flap springs open.

2. Fill the detergent dispenser with detergent powder or insert the detergent tablet. The marking indicates the filling level.

You can choose to add a detergent tablet alone or to add detergent powder to both the main wash detergent chamber and the pre-wash detergent chamber for your selected wash cycle.

3. All programmes with pre-wash need an additional detergent dosage that must be placed in the pre-wash detergent chamber (please refer to the wash cycle table). This detergent will take effect during the pre-wash phase.

4. Close the lid firmly so that it clicks into place.
adding rinse aid

Rinse aid helps to ensure water does not cling and leave marks on crockery during the drying phase and helps crockery dry faster after it has been washed. Only pour rinse aid that is for domestic dishwashers into the reservoir. This model is designed to use liquid rinse aids only.

Please follow the steps below to pour the rinse aid into the storage reservoir, and the amount will dispense automatically.

1. Turn the cap and open as indicated.

2. When the cap open marking is aligned, you may lift the cap up.

3. Pour the rinse aid in until the level indicator turns completely black in colour and close the cap.

4. Be careful not to overfill the reservoir. Wipe up any spills. The approximate volume of the rinse aid reservoir is 110ml.

If the water hardness in your area is soft, you may not need rinse aid as it may cause white film to develop on your dishes.

Rinse aid warning light will illuminate when the reservoir is running out of rinse aid and requires refilling.

Alternatively, you can judge the amount of rinse aid by checking the rinse aid indicator right next to the reservoir’s cap. When the indicator is black, it means it is full. When it is clear, it means it is almost empty.

adjusting the rinse aid reservoir

The rinse aid reservoir has six settings. Both the recommended setting and the factory setting is “4”. If the dishes are not drying properly or are spotted, adjust the dial to the next higher number until your dishes are spot-free.
adding salt

If the water in your area is hard, deposits will form on your dishes and utensils. This appliance contains a salt reservoir for you to reduce the hardness of the water.

Please follow the steps below to pour the salt into the salt reservoir and it must be set to correspond to the water hardness level in your area.

1. Remove the lower basket and unscrew the reservoir cap.

2. Fill the reservoir with approximately 500ml of water (first use only).

3. Place the funnel provided over the salt reservoir.

4. Pour in approximately 1.2kg of dishwasher salt depending on the brand used.

5. Clean any excess salt from around the reservoir opening and then screw the cap on again firmly.

6. Run the "rapid" wash programme immediately (without any crockery in the dishwasher) to remove any traces of salt from the compartment.
   - The salt warning light will illuminate when the reservoir is running out of salt and requires re-filling.
   - The salt warning light will cease to illuminate within a few days depending on how quickly the salt dissolves.
Adjusting Salt Consumption

Salt consumption must be adjusted to correspond to the water hardness level in your area. If you don’t know how hard the water in your home is, please ask the company that supplies water in your area.

It is recommended that adjustments should be made in accordance with the following chart.

<table>
<thead>
<tr>
<th>water hardness</th>
<th>selector position</th>
<th>salt consumption (gram/cycle)</th>
<th>number of cycle / 1.2 kgs</th>
</tr>
</thead>
<tbody>
<tr>
<td>dh</td>
<td>fh</td>
<td>mmol/l</td>

</tr>
<tr>
<td>0-8</td>
<td>0-14</td>
<td>0-10</td>
<td>0-1.4</td>
</tr>
<tr>
<td>8-22</td>
<td>14-39</td>
<td>10-28</td>
<td>1.4-3.9</td>
</tr>
<tr>
<td>22-45</td>
<td>39-80</td>
<td>28-56</td>
<td>3.9-8</td>
</tr>
<tr>
<td>&gt;45</td>
<td>&gt;80</td>
<td>&gt;56</td>
<td>&gt;8</td>
</tr>
</tbody>
</table>

- Do not use everyday table salt or cooking salt as they contain insoluble substances which could damage the dishwasher.
- Do not pour detergent into the salt container. This will damage the dishwasher.

To optimise and customise the level of salt consumption, please follow the steps below.
1. Remove the lower basket and unscrew the reservoir cap.
2. There is an arrow-shaped indicator in the reservoir, which you can turn. You may turn it to the “-” or “+” settings based on the water hardness in your area.
loading the dishwasher

before loading the dishwasher

Please observe the following notes before loading your cutlery and crockery into the basket.

- Remove lipstick stains and any food residues from crockery and dishes. Rinse if necessary.

- Dishes and cutlery must not lay inside one another, or cover each other.
- Load your cutlery and crockery so that water can access all surfaces.

- Ensure all items are securely positioned.
- Hollow items such as cups, glasses, pans, etc. must be placed upside down in the basket.
- Wide based items should be placed at an angle so that water can run off them freely.
- The spray arms must not be blocked by items which are too tall or hang through the baskets. If in doubt, test for free movement by manually rotating the spray arms.
- Ensure that small items cannot fall through the holders in the baskets.

⚠️ Do not wash items soiled with ash, sand, wax, lubricating grease or paint in the dishwasher. Ash does not dissolve and can distribute in the dishwasher. Wax, sand, lubricating grease and paint can cause damage to the dishwasher.
upper basket

We recommend using the upper basket for small and lightweight items such as cups saucers, glasses, dessert bowls, etc. Shallow pans or casserole dishes can also be placed in the dishwasher basket.

Long items such as soup ladles, mixing spoons and long knives should be placed lying down across the front of the upper basket.

adjusting the upper basket

More space can be created for large items on the upper or lower baskets by adjusting the height of the upper basket. Ensure that the rail stop is placed back properly after the height adjustment.

loading the upper basket for 14 place settings

For loading the upper basket, please refer to the table below.

<table>
<thead>
<tr>
<th>number</th>
<th>item</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>cups</td>
</tr>
<tr>
<td>2</td>
<td>small serving bowl</td>
</tr>
<tr>
<td>3</td>
<td>large serving bowl</td>
</tr>
<tr>
<td>4</td>
<td>glasses</td>
</tr>
<tr>
<td>5</td>
<td>saucers</td>
</tr>
<tr>
<td>6</td>
<td>small dish</td>
</tr>
<tr>
<td>7</td>
<td>dessert dishes</td>
</tr>
</tbody>
</table>
**hinged cup rack**

To make room for taller items in the upper basket, raise the cup rack upwards. You can then lean the tall glasses against it. You can also remove it when it is not required for use.

To prevent water dripping from the upper basket onto the dishes in the lower basket, we recommend that you empty the lower basket first and then the upper basket.

**lower basket**

We recommend that large and the most difficult to clean items are placed in the lower basket, such as plates, serving platters, saucepans, serving bowls, pots, pans, lids etc. We recommend placing serving dishes and lids at the side of the basket to avoid blocking the rotation of the spray arms.

**hinged spikes**

The spikes are used for holding plates and a platter. They can be lowered to make more room for large items. Please refer below for the steps to lower the spikes.
**loading the lower basket**

For loading the lower basket, please refer to the table below.

<table>
<thead>
<tr>
<th>number</th>
<th>item</th>
</tr>
</thead>
<tbody>
<tr>
<td>7</td>
<td>dessert dishes</td>
</tr>
<tr>
<td>8</td>

<tr>
<td>8</td>
<td>serving fork</td>
</tr>
</tbody>
</table>

- Do not let any items extend through the bottom of baskets.
- To avoid the risk of injury, please load your knives and forks with handles upwards. Do not hold them by their sharp edges.
- The cutlery basket comes with covers, and they are designed for you to load the cutlery into the appropriate slots. If you use the basket without the cover, it may reduce the washing results of your cutlery.
- Please ensure the cover is securely locked to the basket before operation.
- To comply with Standards of Performance, i.e. EN50242, all cutlery must be loaded according to the instructions in this manual.
starting a wash cycle

Please follow the steps below to start a wash cycle.

1. Ensure the unit is connected to the mains power and the water supply is on (water pressure between 0.04MPa and 1.00MPa).
2. Open the door. Pull out the lower and upper baskets, load the dishes and push the baskets back.
3. Pour in the detergent or place the detergent tablet in the detergent compartment and close firmly afterwards.
4. Press the on/off button, the power indicator light will illuminate.
5. Select the wash cycle programme based on the loading and soil requirements. Please refer to the “Wash Cycle Table” (page 14).
6. The indicator light of the selected programme will illuminate.
7. Close the dishwasher door. A click sound should be heard when the door is closed correctly. Do not slam the door.
8. The washing cycle will begin shortly.

⚠️ If you open the dishwasher door during the washing cycle and then close it, the dishwasher will continue the current washing programme after 10 seconds. However, if the door is not closed correctly after 1 minute, the dishwasher will make an audible sound at 1 minute intervals.

changing a programme

To change the programme if the washing cycle has already started, follow the steps below.

1. Open the door slightly to check if the unit has dispensed the detergent or detergent tablet. This will depend on how long the washing cycle was running for.
2. If the detergent dispenser lid is opened, we suggest you to allow the wash cycle to complete.
3. If the detergent dispenser lid is still closed, press and hold the programme button for 3 seconds to cancel the programme. Then, press the programme button to choose the required new programme and close the dishwasher door. The unit will start the new washing cycle shortly.

at the end of a programme

At the end of a programme, the dishwasher will make an audible sound.

⚠️ The condensation strip helps to prevent the risk of steam damage to the worktop edging above the dishwasher, it is advisable to leave the door closed until you are ready to unload the crockery. However, you can also open the dishwasher door fully and wait until the dishes and crockery are cool enough to unload. Do not leave the door only partially open.
switching off the unit

To save energy, remember to switch the dishwasher off using the on/off button. The dishwasher will continue to use electricity until it is switched off with the on/off button.

If the dishwasher is not going to be used for a long period of time, e.g. whilst on holiday, disconnect the unit from the mains supply.

unloading the dishwasher

Allowing dishes to cool down before unloading is important as dishes tend to break and chip more easily when they are hot. Therefore, if you open the dishwasher door fully after switching off, it will allow the dishes to cool down much faster.

- Unload the lower basket first, followed by the cutlery basket and then the upper basket.
- This will prevent water drops from the upper basket from falling on to the dishes in the lower basket.

delay start

The starting time of a washing programme can be delayed and adjusted. Please follow the steps below.
1. Open the dishwasher door and load your soiled dishes and crockery.
2. Press the on/off button to turn on the dishwasher.
3. Select your preferred programme.
4. Press the delay button.
5. Set the required delay start time using the delay button.
   - Each press of this button increases the delay start time by 1 hour increments.
6. Close the door and the unit will start the programme at the assigned time automatically.

half load

In case you do not have enough dishes for a full load, the half load option can be selected for washing with upper spray only. Load the dishes in the upper basket only. This will bring about a savings in hot water and electricity. Please follow the steps below.
1. Open the dishwasher door and load your soiled dishes and crockery onto the upper basket.
2. Press the on/off button to turn on the dishwasher.
3. Select your preferred programme.
4. Press the “1/2” button.
5. Close the door and the unit will start the programme with upper spray only.
cleaning after use

external care

the door and the door seal
- Clean the door seals regularly with a soft damp cloth to remove food deposits.
- When the dishwasher is being loaded, food and drink residues may drip onto the sides of the dishwasher door. These surfaces are outside the wash cabinet and are not accessed by water from the spray arms. Any deposits should be wiped off before the door is closed.

the control panel
If cleaning is required, the control panel should be wiped with a soft damp cloth ONLY.

internal care

filtering system
The filtering system in the base of the wash cabinet captures large particles of suds solution. Build up of these particles may cause the filters to block. Check the condition of the filters regularly and clean them if necessary under running water.
Follow the steps below to clean the filters in the wash cabinet.
1. Ensure the dishwasher is switched off.
2. Turn the coarse filter anti-clockwise and gently lift it out.
3. Gently lift the coarse and fine filter out.
4. Rinse all the filters under running water, including the filter cylinder, and then refit all filters in the following order.
5. Gently refit the main filter back with care.
6. Gently rescrew the course and fine filter in clockwise direction.

• NEVER
spray arms

Particles of food can get stuck in the spray arm jets and bearings. The spray arms should therefore be checked and cleaned regularly.

- Ensure the dishwasher is switched off. Use a pointed object, e.g. a cocktail stick, to loosen food particles in the spray arms' jets.

⚠️ Do not attempt to remove the spray arms.

frost precaution

Avoid placing the dishwasher in a location where the temperature is below 0°C. If your appliance is left in an unheated place over the winter, you are advised to:

1. Disconnect the unit from the water inlet.
2. Turn on the unit. Select any washing cycle and let it run for 1 minute only. This will allow all the excessive water that remains in the unit to drain out.
3. Disconnect from the mains socket.
4. Empty the dishwasher.
5. Close the dishwasher’s door.
6. Disconnect the unit from the water drain. Use a suitable receptacle to catch the water.

Should you encounter any difficulties with the above steps, please ask a service technician for assistance.

moving the dishwasher

If you have to move the unit, for instance due to moving house, you are advised to:

1. Disconnect the dishwasher from the mains socket.
2. Disconnect the unit from the water inlet and drain. Use a suitable receptacle to catch the water.
3. Remove the unit from the current location with the hoses discharged.
4. Pull the unit out together with the hoses.

⚠️ Avoid over tilting the unit during transportation.
- We recommend that 2 people handle the dishwasher during installation.

maintenance after a prolonged period of non-operation

If you are not going to use the unit for a prolonged period of time, you are advised to:

1. Disconnect the dishwasher from the mains socket.
2. Disconnect the unit from the water inlet and drain. Use a suitable receptacle to catch the water.
3. Open the door slightly to prevent unpleasant smells building up in the compartment.
4. Ensure the washing compartment of the dishwasher is clean.

disposal of the dishwasher

- When disposing your old dishwasher, first make it unusable. Disconnect the hoses and unplug the mains cable. Cut off the mains cable from the dishwasher. Make the door lock inoperative, so that children cannot accidentally shut themselves in. Make appropriate arrangements for the disposal of the dishwasher.
- At the end of its working life, the product must not be disposed of as urban waste. It must be taken to a special local authority differentiated waste collection centre or to a dealer providing this service. Disposing of a household appliance separately avoids possible negative consequences for the environment and health deriving from inappropriate disposal and enables the constituent materials to be recovered to obtain significant savings in energy and resources. As a reminder of the need to dispose of household appliances separately the product is marked with a crossed out wheeled dustbin.
- Please ensure that it presents no danger to children while being stored for disposal.

disposal of packing material

Please dispose of the plastic wrappings and bags safely and keep out of the reach of babies and young children.

Features and specifications are subject to change without prior notice.

### Note:

1. A + + + (highest efficiency) to D (lowest efficiency)
2. Based on 280 standard cleaning cycles using cold water fill and the consumption of the low power modes. Actual energy consumption will depend on how the appliance is used.
3. A (most efficient) to G (least efficient)
4. This is the program used for the Energy label information and is suitable for cleaning soiled normally soiled tableware. It is the most efficient programme in terms of its combined energy and water consumption for that type of tableware.
6. The above values have been measured in accordance with standards under specified operating conditions. Results may vary greatly according to quantity and pollution of the dishes, water hardness, amount of detergent, etc.
safety warnings

general use
• Switch off and unplug before fitting or removing tools/attachments, after use and before cleaning.
• Keep your fingers away from moving parts and fitted attachments.
• Never use a damaged machine.
• Keep the mains cable out of reach from children.
• Keep power unit, mains cable and plug away from water.
• Never exceed the maximum capacities.
• When using an attachment, read the safety instructions.
• Take care when lifting this appliance.
• This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.
• Children should be supervised to ensure that they do not play with the appliance.
• Only use the appliance for its intended domestic use. The company responsible for this product, DSG Retail Limited, will not accept any liability if the appliance is subject to improper use, or failure to comply with these instructions.
• This appliance is intended to be used in households and similar places such as:
  - Staff kitchen areas in shops, offices and other work places.
  - By clients in motels, hotels and Bed & Breakfast establishments.

WARNING!
• Improper connection of the equipment-earthing conductor could result in a risk of electric shock.
• The wires in the cord are coloured as follows:
  - Green and Yellow = Earth,
  - Blue = Neutral,
  - Brown = Live.
• Check with a qualified electrician or service representative if you are in doubt whether the appliance is properly earthed or the plug does not fit correctly.
• Never modify the plug provided with the appliance.

proper use
• Do not sit or stand on the door or dish rack.
• Do not touch the heating element during or immediately after use.
• Do not operate your dishwasher unless all enclosure panels are properly in place. Open the door very carefully when there is a programme running as there is a risk of hot water spraying out of the appliance.
• Do not place any heavy objects on the open door. The appliance could tip over.
• Do not allow plastic items to come into contact with the heating element.
• Check that the detergent receptacle is empty after completion of the wash cycle.
• Do not wash plastic items unless they are marked dishwasher safe or equivalent.
• Use only detergent and rinse aids designed for an automatic dishwasher.
• Other means for disconnection from the mains power supply must be incorporated in the fixed wiring with at least 3mm contact separation in all poles.
• Keep children away from detergents and rinse aids. These may cause chemical burns in the mouth, throat and eyes or asphyxiation.
• Keep children away from the dishwasher when the door is open.
• The door should not be left in the open position since this could present a tripping hazard.
• For energy saving, always remember to switch the dishwasher off when you have finished using it. The dishwasher should not be left unattended when in use.
• If the mains cable is damaged, it must be replaced by the manufacturer or its service agent in order to avoid a hazard.
• Remove the door to the washing compartment when removing an old dishwasher from service or discarding it.
• During installation, the mains cable must not be excessively or dangerously bent or flattened.
• Do not tamper with controls.
• The appliance is to be connected to the water mains using new hose sets.
• The maximum number of place settings to be washed is 14.
• The maximum permissible inlet water pressure is 1Mpa, and the minimum permissible inlet water pressure is 0.04Mpa.

earthing instructions

WARNING: THIS APPLIANCE MUST BE EARTHED.

• This appliance is equipped with a mains cable having an equipment-earthing conductor and an earthing plug.
• The plug must be plugged into an appropriate mains socket that is installed and earthed in accordance with local standards and requirements.
NOTE: If you require a replacement for any of the items listed below, please quote their corresponding part numbers:
