Safety Warnings

For your continued safety and to reduce the risk of injury or electric shock, read all instructions carefully before using the unit and keep them for future reference. Please follow all the safety precautions listed below.

Retain this manual. Include this manual if you pass the unit onto a third party.

WARNING!

•Never allow large loads to remain in the dryer after each drying cycle ends.

•Softener sheets can cause a waxy build-up on the lint filter. Wash the lint filter in warm soapy water and dry it completely before replacing it in the dryer.

•Do not leave damp items in a warm or hot dryer. Start the drying cycle immediately and keep the exhaust opening clutter free.

•Do not climb on the dryer. You may hurt yourself or damage the dryer.

•If you will not be using the dryer for a while, such as when you go on holiday, turn off the electricity supply to the dryer and remove the plug from the socket.

•Never stop a tumble dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.

•Never store plastic, paper or clothing that may burn or melt on top of the dryer during operation.

•Keep flammable substances well away from the dryer – for example kerosene, gasoline, benzene, paint thinner and alcohol, or clothing soaked with these. They may cause an explosion or a fire.

•All airways (including wall vents) must be kept free from blockages.

•Never use the dryer without the lint filter.

•Never place heavy items or wet washing directly on top of the appliance.

Installation

•Check that the voltage marked on the rating label matches your mains voltage.

•The appliance must be placed on a flat stable surface (not on a carpet) and should not be subjected to excessive vibrations or any impact.
• Do not install your dryer anywhere that is exposed to high humidity, water or the weather. If you do, it may cause an electric shock, fire, failure or deterioration.

• Your tumble dryer should NOT be located next to a gas hob, cooker, heater, or eye-level grill as flames from the burners could cause damage to your machine.

• DO NOT operate the dryer in an enclosed environment, ensure the dryer is adequately ventilated.

• If the dryer is enclosed or fitted under a work surface, a gap of at least 10mm must be allowed above the top of the dryer and at least 25mm (1”) either side. This allows air to enter into the rear air inlet. The dryer must NEVER be run in a cupboard with a closed door.

• Do not stack the tumble dryer on top of other appliances.

• Any electrical work required to install the appliance should be carried out by a qualified person.

• Failure to install, maintain and/or operate the dryer according to the manufacturer’s instructions may result in conditions which can lead to bodily injury and/or property damage.

• Ensure that the end of the hose is not directed towards the air intake grille at the rear of the dryer.

• The ventilation openings at the rear of dryer must not be obstructed by a carpet.

• The exhaust air must not be discharged into a flue that is used to extract fumes from an appliance burning gas or other fuels.

• The appliance must not be installed behind a lockable door, a sliding door or a door with a hinge on the opposite side to that of the tumble dryer, in such a way that a full opening of the tumble dryer door is restricted.

• Do not use a mains plug adapter or extension cable. It may overheat and cause a fire.

• Do not operate this dryer until you are sure the dryer has been installed according to the INSTALLATION INSTRUCTIONS, and installation and grounding are in compliance with all local codes and/or other applicable codes and requirements.

• Before the appliance is removed from service or discarded, remove the door of the drying compartment.
Caring for Laundry

• The dryer must only be used for its intended purpose.

• Always observe the rules for drying garments. If in doubt, do NOT tumble dry.

• Take particular care that woolen articles are NOT dried in a tumble dryer unless they are labelled ‘Superwash’, ‘Machine Washable’ or have the ‘May be tumble dried’ symbol. If in any doubt, do not dry wool in the machine. Unlike other materials, the mechanism of wool shrinkage is irreversible, i.e. it will not stretch back to its original size and shape.

• Do not dry water-proof sheets or clothing. These may cause dryer failure, which could lead to injury, or damage to the laundry or to the dryer.

• Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the tumble dryer.

• Fabric softeners, or similar products, should be used as specified by the fabric softener instructions.

• Do not dry unwashed items in the tumble dryer.

• Do not attempt to dry dripping wet articles.

• Do not overload the dryer with laundry. Drying results may be unsatisfactory.

• Be careful not to get your laundry caught in the door when you close it. This could damage your laundry.

• Always check and remove objects such as nails, pins, coins, clips, etc. Cigarette lighters, in particular, present a hazard that can be avoided by this process. They could damage your laundry or the dryer.

• Do not dry articles that have been previously cleaned in, washed in, soaked in, or spotted with gasoline, dry cleaning solvents, other flammable, or explosive substances as they give off vapours that could ignite or explode.

• Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the tumble dryer.

General Use

• This appliance is for normal, indoor, household, domestic use only.

• The maximum mass of dry textile material to be used in the appliance is
7kg.

- Make sure the mains plug is pushed firmly in the socket. A loose connection may overheat and cause electrical shock or a fire.

- Check the mains lead and mains plug for any wear and tear, looseness, or damage. If the mains cable is damaged, it must be replaced by a qualified service agent in order to avoid a hazard.

- Check the mains plug regularly for dirt. If dirt accumulates on the mains plug, it could cause a fire. To prevent this, unplug the cable and clean the mains plug with a dry rag.

- If you disconnect the mains plug, hold onto the mains plug not the cable. Pulling the cable may cause an electric shock or a fire.

- Do not touch the laundry inside the dryer, not until the drum has completely stopped. Even if the drum is spinning at low speed it can cause an injury. Take particular care of children.

- Do not operate the dryer with any guards and/or panels removed.

- Never attempt to operate this appliance if it is damaged, malfunctioning, has missing or broken parts, including a damaged mains cable or plug.

- Do not bypass any safety devices.

- Do not allow the air inlet at the back of the dryer, the air outlet or vent hose to be obstructed.

- Do not touch the mains lead or mains plug with wet hands. It may cause an electric shock.

- Do not put any electrical equipment near the dryer.

- The final part of a tumble dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
CAUTION: WHEN THE DRYER IS IN USE AVOID TOUCHING THE REAR OF THE DRYER AS IT MAY BE HOT.

Cleaning & Maintenance

• Clean the lint filter before and after every load.

• If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

• Keep all the area surrounding exhaust openings free from accumulation of dust, lint and dirt. An obstructed opening may reduce airflow and efficiency.

• Do not use the dryer if industrial chemicals have been used for cleaning.

• Do not pour water directly onto any part of the dryer. It may cause a short circuit or electric shock.

• Keep burning objects, such as candles or cigarettes, away from the dryer. They may cause a fire or damage.

• The interior of the machine and exhaust duct should be cleaned periodically by qualified service personnel.

• Do not dismantle, repair or modify the dryer. The dryer could malfunction and cause a fire or injury. If service is required, contact a qualified service agent.

IT IS HAZARDOUS FOR ANYONE OTHER THAN AUTHORISED SERVICE PERSONNEL TO CARRY OUT SERVICING OF REPAIRS WHICH INVOLVE THE REMOVAL OF COVERS.

TO AVOID THE RISK OF AN ELECTRICAL SHOCK DO NOT ATTEMPT REPAIRS YOURSELF.
Thank you for purchasing your new Dryer.

We recommend that you spend some time reading this instruction manual in order that you fully understand all the operational features it offers. You will also find some hints and tips to help you resolve any issues. Read all the safety instructions carefully before use and keep this instruction manual for future reference.

**Unpacking**

Remove all items from the packaging. Retain the packaging. If you dispose of it please do so according to local regulations.

The following items are included:

- The Main Unit
- Instruction Manual
- Vent Hose x 1

If items are missing or damaged please contact Partmaster (UK only). Tel: 0344 800 3456 for assistance.
Installing Your Dryer

Please read and follow the instructions carefully.

- In addition to the instructions mentioned here, special regulations of the relevant power supply companies may apply. If in doubt, have the dryer connected by a qualified technician.
- The dryer is heavy - caution when lifting it. Do not lift by projecting components (e.g. dryer door).
- Lay hoses and cables in such a way that there is no risk of tripping over them.

Choosing the Right Location for Your Dryer

- Make sure there is enough space for your dryer.
- Install your dryer on a flat, stable surface to avoid excessive vibrations and noise.
- Do not install your dryer in direct sunlight. If this appliance is installed in an unheated cold room, the optimum ambient storage temperature must be 5°C or above. If placed below this temperature, the appliance performance will be considerably affected and in some instances may not even operate until the ambient temperature rises above 5°C.
- Start by tilting the dryer backwards.
- One person should stand behind it, holding the rear of the top panel. The other person should grip the bottom feet at the front.
- Do not touch the door opening button (door handle) while holding.
- Check that you have all the required accessories for installation.
- Entrust the installation of the dryer to a qualified technician.

Two or more people are required to move the dryer.
Moving and Installing

Two or more people are required to carry the dryer and for any installation work.

Moving the Dryer from One Location to Another
Before you move the dryer:
- Turn off the power source, and disconnect the mains cable.
- Shrink the vent hose to keep it out of the way.

Installing the Vent Hose
- Connect and fix one end of the vent hose to the back vent of the unit and turn it into the vent until screwed securely.
- Extend the other end to the outdoor. Please refer to the diagrams below for correct assembly.
**Levelling the Dryer**

There are levelling feet on the underside. They must be adjusted to make sure the dryer is level.
1. Adjust all levelling feet.
2. Use a spirit level to ensure the dryer is level.

**Connecting to the Mains Supply**

**For your safety:**
- Do not use a mains plug adapter or extension cable.
- If the mains cable or mains plug are damaged, stop using them and call a qualified technician for assistance.

**Installation Check List**

By now, you should have installed the dryer.
Let us go through the checklist to ensure that the installation has been done correctly!

Product Overview

The unit
Control Panel

1. **Anti-Crease Indicator**
   - Indicator lights up when the anti-crease function is selected.
   - Indicator flashes when programme is running.

2. **Lock Indicator**
   Indicator lights up when the child lock function is activated.
   - Press the Anti-Crease and Delay buttons together for 3 or more seconds to set the child lock.
   - Press the Anti-Crease and Delay buttons together again for 3 or more seconds to release the child lock.

3. **End/Anti-Crease Indicator**
   Indicator lights up after end of wash and when the unit starts the anti-crease mode (default).

4. **Dryness Indicator**
   Indicator lights up when a degree of dryness is selected.
   - Extra Dry
   - Standard Dry
   - Light Dry

5. **Programme Indicator**
   - Indicator lights up when a programme is selected.
   - Indicator flashes when a programme is running.

6. **On/Off Button**
   Switches the machine On and Off.

7. **Start / Pause Button**
   - Press to start your dry programme.
   - Press to pause your dry programme.

8. **Program Button**
   Select the drying programme suitable for your load: Mix / Cotton / Synthetic / 1 Hour.

9. **Dryness Level Button**
   Select the degree of dryness for your load:
   - Extra Dry: Suitable for particularly thick or multi-layered clothing.
   - Standard Dry: Suitable for clothing that will not be ironed.
   - Light Dry: Suitable for ironing.

10. **Delay Button**
    Select the hours for the drying process to start: 9H (hours) / 6H (hours) / 3H (hours).

11. **Delay Indicator**
    Indicator lights up when the hours to start the drying process is selected.

12. **Anti-Crease Button**
    Select to loosen up clothes after drying to reduce creasing.
Preparation

Read the following to understand how best to prepare your laundry for drying.

Preparing to Tumble Dry Laundry

• Before loading laundry into the tumble dryer, thoroughly spin the laundry in the washing machine. This will reduce remaining moisture content and help dry your laundry faster. It will also be more energy-efficient.
• Make sure all zips are closed, buttons are done up, hooks and eyelets are fastened, and ties and belts are already looped.
• Always check the washing label of your clothes to make sure they are suitable for tumble drying. If no washing label is available, it is recommended not to tumble dry your clothes.

Organising Laundry

• Sort your laundry according to fabric type, e.g., polyester/cotton; denim; etc.
• Sort your laundry by colour.
## Selecting the Programme

</tbody>
</table>

Duration of drying may vary due to the moisture content, type of garment fabric, and/or other factors not within the unit’s control. The lower the temperature of the room, the longer it will take for the dryer to dry clothing.

### Drying Laundry Loads 1kg or Less

1. Load your laundry into the dryer.
2. Turn on the dryer.
3. Select 1 Hour programme.
4. Operate as normal.
5. When the programme has finished, press the **On/Off** button to switch off the dryer. Unplug the dryer.
Dry Programme Setting

First Time Use
Before the first use, wipe the dryer drum with a damp cloth to remove any residues which may have been produced during production. Alternatively, run a brief drying cycle (around 1 hour) with damp clothes in the drum.

⚠️ Before use, check that the lint filter is clean and positioned properly in the dryer. Never use the appliance without the lint filter in place.

Standard Drying Cycle
1. Pull the door handle and put the laundry in the drum. Make sure laundry is loose and not caught in the door.
2. Close the door firmly. It will click.
3. Press the On/Off button to switch on the dryer.
4. Press the Program button to select the drying programme appropriate for your load.
5. If you wish to use the anti-crease function, press the Anti-Crease button.
6. Press Dryness Level button to select the dryness level for your laundry.
7. Press the Start/Pause button to start the drying programme. If you wish to delay start the drying programme, press the Delay button to select the hours that you want the drying cycle to start then press the Start/Pause button.
8. When the drying programme has finished, the machine will beep. Press the On/Off button to switch off the dryer. Unplug the dryer.

• If the anti-crease option is selected, it will increase the drying time up to 2 hours.
• Always check the clothing manufacturer’s care label before placing the clothing in the tumble dryer. If in doubt, do NOT tumble dry.

Tips for Optimum Drying
• Do not over-dry the clothes, as this increases the chance of shrinkage and creasing.
• Do not dry clothes containing rubber, foam, and similar elasticated fabrics.
• Do not dry clothes if they have been dry-cleaned.
• Always check your clothes' washing labels for tumble dry suitability. If in doubt, do NOT tumble dry.

Cancelling a Programme
To cancel a drying programme:
1. Press the Start/Pause button.
2. Switch off the power.
The drying programme is now cancelled.
To choose a different programme, turn on the power and use as normal.

⚠️ If you need to pause the unit or open the door for any reason during a drying cycle, take extra care! The interior drum temperature will increase because air movement has been stopped.
Removing Laundry
Always allow the unit to complete the drying cycle before removing laundry.
1. Press the On/Off button to switch off the dryer. Unplug the dryer.
2. Open the dryer door and remove your laundry.

Switching Off
Press the On/Off button to switch off the dryer. Unplug the dryer.

Setting the Child Lock
The Child Lock prevents children from stopping programmes accidentally. It locks all buttons, EXCEPT the On/Off button.
1. Make sure the dryer is plugged into the mains.
2. Switch on the dryer.
3. During a drying programme, press the Dryness Level and Program buttons at the same time for 3 seconds or more to activate the Child Lock function. The machine will beep.
4. Press the Dryness Level and Program buttons at the same time again for 3 seconds or more to cancel the Child Lock function. The machine will beep.
Maintenance – Cleaning the Dryer

Cleaning the Drum

Any rust left inside the drum by metal articles must be removed immediately with chlorine-free detergent.

Never use steel wool.

Do not put laundry in the dryer when cleaning the drum. Unplug the dryer before cleaning.

Cleaning the Exterior of your Dryer

• Clean the outside of your dryer with a soft cloth and mild detergent such as kitchen detergent.
• Do not splash water over the dryer.
• Do not use cream cleansers, thinners or products containing alcohol or kerosene.

Cleaning the Door Seal and Window

• Wipe the window and seal after each use to remove lint and stains. If lint builds up, it can affect drying performance.
• Remove any coins, buttons and other objects from the door seal after each drying cycle.

Cleaning the Lint Filter

1. Open the door.
2. Pull the lint filter straight up.
3. Open the lint filter.
4. Clean using a cloth to wipe away lint and dust. You can also wash the lint filter, but you must thoroughly dry it afterwards.
5. Replace the lint filter firmly.

Cleaning the Vent Hose

1. Turn off the dryer and remove the plug from the mains.
2. Undo the vent hose.
3. Thoroughly air the vent hose. You can also rinse out the vent hose with cold water, but you must thoroughly dry it afterwards.
4. Replace the vent hose firmly.

Be careful not to burn yourself while handling your clothes or touching the inside of the drum after a high temperature drying cycle. Periodically check the condition of the vent hose for signs of blockage.
# Hints and Tips

<table>
<thead>
<tr>
<th>Problems</th>
<th>Description / Possible Cause</th>
<th>Solution</th>
</tr>
</thead>
</table>
| Dryer will not start. | • Power cut.  
• The plug is not firmly inserted into the mains.  
• Overloading.  
• **On/Off** button or **Start/Pause** button has not been pressed.  
• Temperature fuse has blown. | • Restore power.  
• Check the plug and make sure it is fully and firmly inserted into the mains socket.  
• Remove some laundry. The load must NOT exceed 7kg.  
• Press the **On/Off** button to turn on the dryer, then press **Start/Pause** to start the drying programme.  
• Please contact a qualified service agent for repairs. |
| Exterior is hot / burning smell. | • The lint filter is dirty.  
• Vent hose may be dirty or clogged with lint / dust. | • Make sure the lint filter is cleaned before and after each use of the dryer.  
• Clean the vent hose. |
| Clothes are too dry. | • Clothes were not removed promptly after the drying cycle had finished.  
• Temperature is too high. | • Remove clothes promptly after the drying cycle is finished.  
• Check the apparel's cleaning label to make sure you have selected the correct drying programme. |
| Clothes are still wet / not dry enough. | • Too many clothes in the drum.  
• Clothes were not sorted prior to tumble drying. | • Remove some of the laundry. The load must NOT exceed 7kg.  
• Sort clothes before tumble drying. |
| Clothes have shrunk. | • Selected drying programme was unsuitable. | • Check the apparel's cleaning label to make sure you have selected the correct drying programme.  
• Remove the clothes while they are still damp, then line dry. |
| Drying results still unsatisfactory. | • Wrong programme selected.  
• Lint filter / vent hose is clogged.  
• Overloading.  
• Ventilation slots covered.  
• Residue on drum interior or drum ribs. | • Check the apparel's cleaning label to make sure you have selected the correct drying programme.  
• Clean the lint filter / vent hose before and after each use of the dryer.  
• Remove some laundry. The load must NOT exceed 7kg.  
• Uncover ventilation slots.  
• Clean the drum interior and ribs. |
| Door will not close. | • Lint filter not in place.  
• An item is obstructing the door. | • Check if the lint filter is present.  
• Check if the lint filter is properly inserted.  
• Clear / remove obstructing item. |
| Drying cycle ends shortly after programme starts. | • Not enough laundry.  
• Laundry is too dry for the selected programme. | • Add more laundry, or select a higher drying level (e.g., Extra Dry). |
### Troubleshooting

If both 3H and 6H lights are flashing, an error in the temperature sensor occurs.

1. Press the **On/Off** button to switch off the dryer.
2. Pull out the mains plug.
3. Call a qualified service agent for assistance.

Product Fiche

Brand: Logik
Model: LVD7W15
Rated capacity: 7 kg
Dryer Type: Air-Vented
Energy efficiency class: C

Energy consumption 520 kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used.

This is an automatic tumble dryer.
EU Ecolabel: N/A
Energy consumption of the standard cotton programme at partial load: 2.28 kWh
Energy consumption of the standard cotton programme at full load: 4.48 kWh

Power consumption (off-mode): =0.49 W
Power consumption (left-on mode): =0.49 W
Duration of the left-on mode: 10 minutes

Cotton + Standard programme, which is the “standard cotton programme” used at full and partial load, is the standard drying programme to which the information in the label and the fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton.

Weighted programme time of the standard cotton programme at full and partial load: 105 minutes
Programme time of the standard cotton programme at full load: 145 minutes
Programme time of the standard cotton programme at partial load: 75 minutes

Sound power level for the standard cotton programme at full load: 69 dB
