Safety Warnings

Optical:
Never point the optical sensor towards the face, particularly the eyes, to avoid possible injury.

While the mouse is in use, the optical light is visible to the naked eye. Be careful not to look directly into the emitter hole while the mouse is active.

Wireless Devices:
• Before boarding any aircraft or packing a wireless device in luggage that will be checked in, remove the batteries from the wireless device.
• Wireless devices can transmit radio frequency (RF) energy, whenever batteries are installed and the wireless device is turned on.

Battery-Powered Devices:
• Improper use of batteries may result in battery fluid leakage, overheating, or explosion.
• Leaked battery fluid is corrosive and may be toxic. It can cause skin and eye burns, and is harmful if swallowed.
To Reduce the Risk of Injury:

- Keep batteries out of the reach of children.
- Do not heat, open, puncture, mutilate, or dispose of batteries in fire.
- Do not mix new and old batteries or batteries of different types.
- Do not allow metal objects to touch the battery terminals on the device; they can become hot and cause burns.
Thank you for purchasing your new Mouse.

We recommend that you spend some time reading this instruction manual in order that you fully understand all the operational features it offers. You will also find some hints and tips to help you resolve any issues. Read all the safety instructions carefully before use and keep this instruction manual for future reference.

Unpacking

Remove all items from the packaging. Retain the packaging. If you dispose of it please do so according to local regulations.

The following items are included:

- Main Unit
- Nano Dongle
- AA Size Battery x 1
- Instruction Manual
Product Overview

Top View

- Left Mouse Button
- Right Mouse Button
- Scroll Wheel
- LED indicator - highlights which operating mode you are in (Wi-Fi or Bluetooth) and highlights the DPI settings.
- DPI Button, also changes between Wireless and Bluetooth modes.

Bottom View

- ON/OFF Switch
- BLUE Button, for pairing your mouse.
- Battery Compartment and Dongle Storage
- USB Dongle
System Requirements

Operating Systems: Microsoft® Windows® 7 / 8 / 10
MAC® OS X

Hardware: 1 available USB port

Installing the Battery

When battery is low, the LED indicator will flash.
1. Lift the battery cover up.
2. Insert 1 x AA battery.
3. Close the battery cover.

• Please ensure the batteries’ polarities (+ / −) match the battery compartment’s polarities.
• To save energy, slide the ON/OFF switch to the OFF position to turn off the mouse.
Basic Operation

Powering On/Off
Slide the **ON/OFF** switch at the bottom of the mouse to turn the mouse on or off.
When switching on the unit, the LED indicator will light up for 2 sec in **2.4GHz Wireless** mode or 5 sec in **Bluetooth®** mode.

Selecting Mode
Press and hold the DPI button for 3 sec to switch between **2.4GHz Wireless** and **Bluetooth®** modes.
When **2.4GHz Wireless** mode is selected, LED indicator will light up for 2 sec.
When **Bluetooth®** mode is selected, LED indicator will light up for 5 sec.

Selecting DPI (Dot per Inch)
Press the **DPI** button to select sensitivity 1000 (less sensitive) or 1600 (more sensitive).
If DPI 1000 is selected, the LED indicator will slow flash 3 times.
If DPI 1600 is selected, the LED indicator will quick flash 5 times.
Connecting in 2.4GHz Wireless Mode

Plug the dongle directly into the USB port of your device. It will install a mouse driver (this may take a minute or two). You need both for your mouse to function properly. The USB nano dongle is location in the base of the packaging. It should be stored in the battery compartment when not in use.

Automatic Pairing

1. Slide the ON/OFF switch to ON.
2. Press and hold the DPI button for 3 seconds, the LED will light up for 2 seconds.

You will now be in 2.4GHz Wireless mode, the mouse will automatically activate. This could take a few seconds.
When the drivers are installing you’ll see a symbol in the taskbar. If you click on it you’ll see the Device Setup menu, wait for the drivers to install.

**Manual Pairing**

If automatic pairing fails, pair the dongle with the mouse manually.

1. Remove the dongle from device USB port.
2. Slide the **ON/OFF** switch to ON.
3. Press the **$ BLUE** button at the bottom of the mouse. The mouse will enter the pairing mode and the LED indicator will flash quickly.

4. Plug the dongle into the USB port within 20 sec.
5. After successfully connecting in **2.4GHz Wireless** mode, the LED indicator light will extinguish.
Connecting in Bluetooth® Mode

1. You must have a Bluetooth® device to work with this mouse. Switch on your Bluetooth® device, and make sure Bluetooth® is switched on.

2. On the mouse, slide the ON/OFF switch to ON. You now need to make sure your mouse is in Bluetooth® mode.

3. Press and hold the DPI button for 3 seconds, if the LED lights up for 5 seconds you are in Bluetooth® mode. If not press and hold the DPI button again.

4. Press and hold the **BLUE** button, the LED indicator light will flash, it’s now in pairing mode which will last for 120 seconds.

5. On your device, search for a mouse with Bluetooth® technology. Select the mouse named “SMBT17”. If you are asked to enter a code, type in 0000 or 1234.

6. Your mouse is now paired with your device.
Hints and Tips

Mouse Not Working:
• Ensure the mouse is switched on.
• Move the mouse closer to the device.
• If the mouse is moving erratically, change the working surface which the mouse is operating on.
• Restart the computer.
• Check battery installation. Replace battery if needed.
• The mouse may not work smoothly on white paper and glass surfaces. We recommend using mouse pad.

In Bluetooth® mode:
• Ensure you are in Bluetooth® mode.
• Ensure your Bluetooth-enabled device’s wireless function is active.
• Ensure there are no other wireless devices in discovery mode.
• Ensure your computer’s operating system supports wireless input devices (e.g. mice and keyboards), and is the latest version.
• Pair again the mouse and the device.

In Wireless mode:
• Ensure you are in 2.4 GHz Wireless mode.
• Make sure the Nano Dongle is plugged into a USB port and the computer is on or try the Nano Dongle in a different USB port.
• If the Nano Receiver is plugged into a USB hub, try plugging it directly into the computer.
• If mouse performance is slow or intermittent around a wireless network, unplug the Nano Dongle from the USB port and then reinsert it. To reactivate the mouse, switch it on, off and on again using the ON/OFF switch on the bottom of the mouse.

The symbol on the product or its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste for recycling, please contact your local authority, or where you purchased your product.

Notes for battery disposal

The batteries used with this product contain chemicals that are harmful to the environment.

To preserve our environment, dispose of used batteries according to your local laws or regulations. Do not dispose of batteries with normal household waste. For more information, please contact the local authority or your retailer where you purchased the product.
